

ENTOFOOD Oil

Food grade feedstock / OIL-FG

Entofood Oil (OIL-FG) is a crude oil produced from a single farm-raised insect species.

The cultured species is *Hermetia illucens*, Diptera from the *Stratiomyidae* family.

The oil is extracted from the insect larvae after drying process (see EHIWM).

Feedstock source: fresh/cooked organic side-stream which are not competing with human uses
