

ENTOFOOD Oil

Vegetal-based feedstock / OIL-VEG

Entofood Oil (OIL-FG) is a crude oil produced from a single farm-raised insect species.

The cultured species is *Hermetia illucens*, Diptera from the *Stratiomyidae* family.

The oil is extracted from the insect larvae after drying process (see EHIWM).

Feedstock is 100% of vegetal origin and traceable.

No antioxidant added (unless required by customer).
